The insurer can call for proof of age at any time if he is entitled to do so and no policy shall be deemed to be called in question merely because the terms of the

policy are adjusted on subsequent proof of age of life insured. So, this Section will not be applicable for questioning age or adjustment based on proof of age submitted subsequently.

Annexure IV – SSV Factors

1. Methodology

The Special Surrender Value (SSV) will be calculated using factors given below:

F1 – applicable on yearly annuity amount (Modal annuity x Annuity frequency)

F2 – applicable on Purchase price

F3 – applicable only in case policy is surrendered during the deferment period

The SSV will be calculated as follows:

[F3 x {F1 x Yearly Annuity + F2 x Purchase Price}] less any survival benefits paid in the policy year of surrender.

The factors F1 and F2 depend on: Higher of (Age at surrender, Age at the end of the deferment period)

The factor F3 depends on: Higher of (Duration from Age at surrender to Age at the end of the deferment period, 0)

For a joint life policy, where both the annuitants are alive, age of the younger annuitant is to be considered to compute the SSV as per the opted annuity option.
