Features of ICICI Pru1 Wealth

ICICI Pru1 Wealth is a plan which is designed to give you life cover and help you grow your wealth over the long-term. This policy is unit linked which means that the benefits you receive will depend on the performance of the fund(s) you have selected.

This document has been designed to help you understand your policy better by explaining some of its key features.

The complete details of all the features is available in the Policy Document. Do go through that document as well to get a complete understanding of your policy.

1

How does this plan work?

At the time of entering this policy, you would have made two important choices:

- The premium amount that you will pay, i.e. One Time Premium amount
- The number of years after which your policy matures i.e. Policy Term

Your premium will get invested in the funds of your choice. Your investment will grow as per the returns earned by these funds. At the end of 10 years i.e. in Mar 2031 your policy will mature and a lump sum amount which is equal to your fund value will be paid out to you.

2

What is the premium that I have to pay and for how many years?

You don't have to pay any more premiums, as you have already paid a one-time premium of ₹ 2,00,000/-

3

How will my money be invested in this policy?

Your money will be invested through the Automatic transfer strategy, as this is the option chosen by you to invest your money in this policy.

As per this investment strategy, your premium amount is initially invested in an Income or a Money Market Fund and then a pre-defined amount is transferred every month to an Equity fund.

In your policy you have chosen to invest your premium in Income Fund ₹ 8,333/- . Every month ₹ 8,333/- will be transferred from this fund to Maximiser V Fund which is the equity based fund chosen by you.

How to read and understand this benefit illustration?

This benefit illustration is intended to show what charges are deducted from your premiums and how the unit fund, net of charges and taxes, may grow over the years of the policy term if the fund earns a gross return of 8% p.a. or 4% p.a. These rates, i.e., 8% p.a. and 4% p.a. are assumed only for the purpose of illustrating the flow of benefits if the returns are at this level. It should not be interpreted that the returns under the plan are going to be either 8% p.a. or 4% p.a.

Net Yield mentioned corresponds to the gross investment return of 8% p.a., net of all charges but does not consider mortality, morbidity charges, underwriting extra, if any, guarantee charges and cost of rider, if deducted by cancellation of units. It demonstrates the impact of charges exclusive of taxes on the net yield. Please note that the mortality charges per thousand sum assured in general, increases with age.

The actual returns can vary depending on the performance of the chosen fund, charges towards mortality, morbidity, underwriting extra, cost of riders etc. The investment risk in this policy is borne by the policyholder, hence, for more details on terms and conditions please read sales literature carefully.

Part A of this statement presents a summary view of year-by-year charges deducted under the policy, fund value, surrender value and the death benefit, at two assumed rates of return. Part B of this statement presents a detailed break-up of the charges, and other values.
